6. Slo IPv6 summit

2011 June – November report

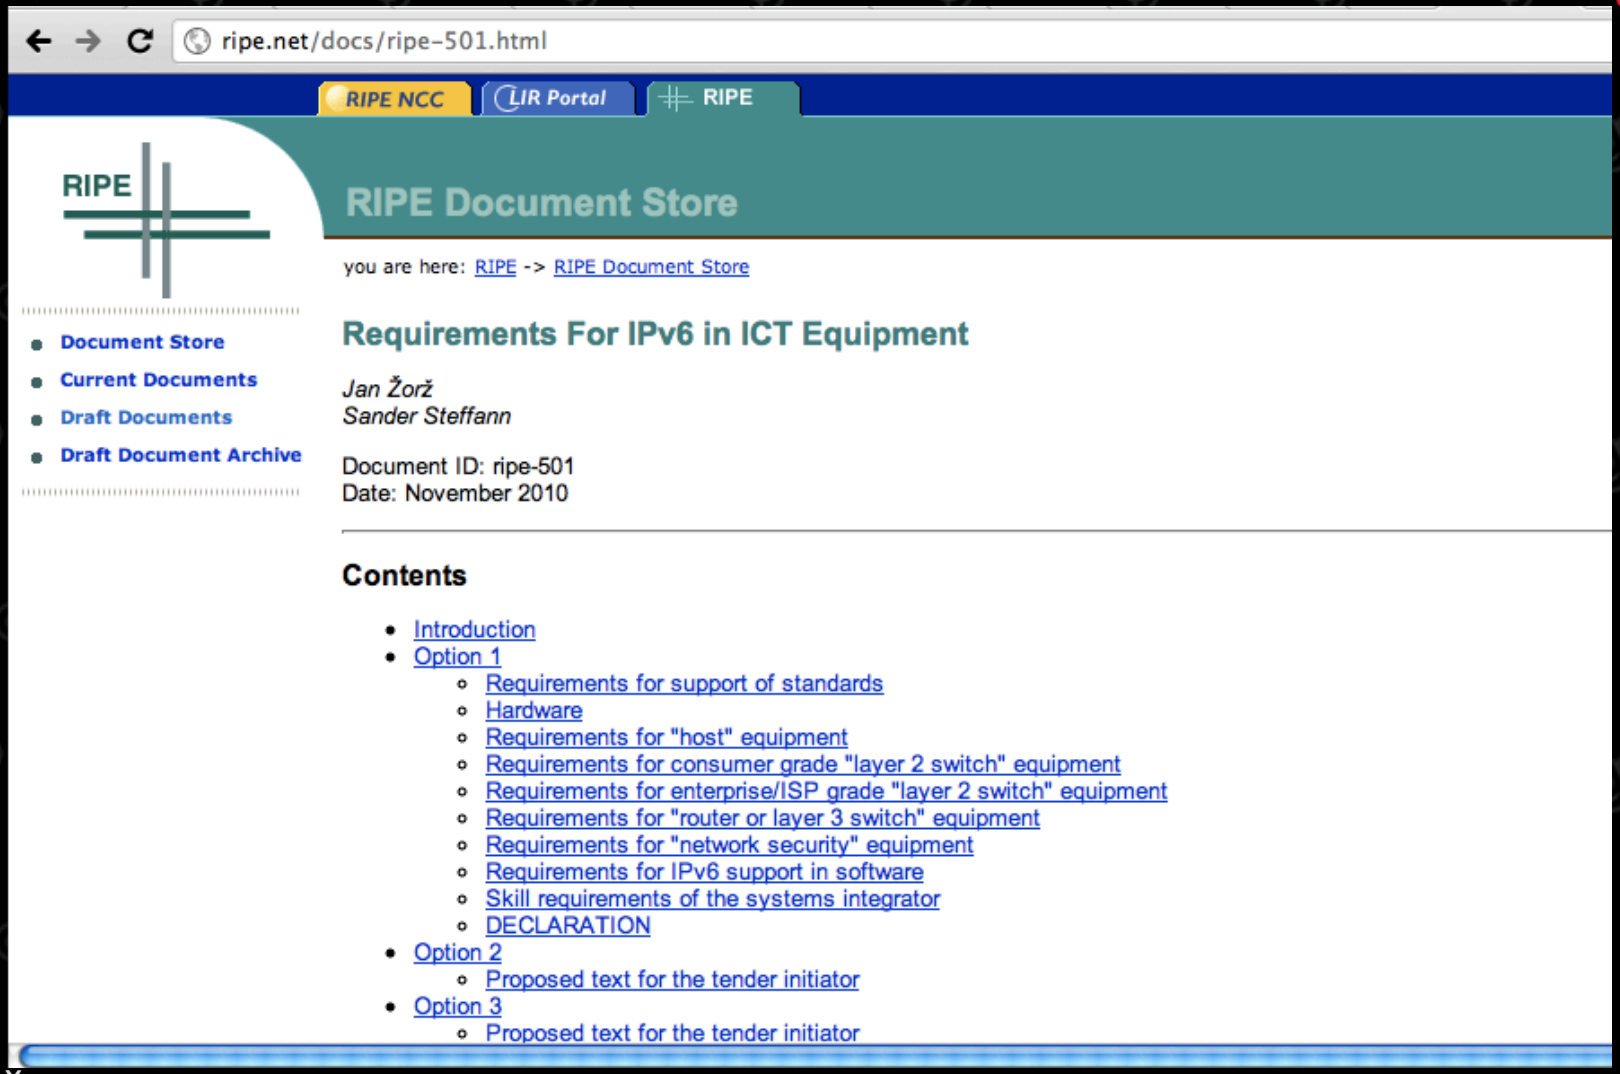
jan@go6.si

CEO

Go6 platforma se širi (novi člani)…

Jan Žorž <jan@go6.si>

RIPE-501 – published!



Jan Žorž <jan@go6.si>

RIPE-501 position paper from a Vendor ☺

VendorX position paper:

*After careful analysis of the RIPE-501 profile, Ci*co is expressing its support for the following reasons:*

The set of features listed is deployment oriented and takes into account architectures that have been validated by experience.

The profile does not restrict itself to a small set of core IPv6 features.

The document lists a coherent set of IPv6 features that are likely to help the industry deploy IPv6 at a faster pace.

http://www.cisco.com/en/US/prod/collateral/iosswrel/ps6537/ps6553/brief_c80-674464.html

RIPE-501”bis”

- Just one option: IPv6 Ready logo or RFC list
- Added CPE, LB and mobile nodes specs
- Merike Käo as new co-author
- Finished the editing phase
- Published on RIPE IPv6 WG mailinglist for discussion, soon under Last Call

See new versions at http://go6.si/RIPE501bis/

Go6 as national Wv6D coordinator

- Delegated coordinator for Slovenia region from ISOC
- 30 websites participated
- All top-5 (24ur, rtvslo, SiOL, najdi.si, podnapisi…)
- Dedicated website: http://dan.ipv6.si/
- World IPv6 Day was a great success
- We learned many things from that day
  - PEBKAC
  - Equipment, network and other services works
  - Just enable it, but don’t forget about security and helpdesk training

Go6 as national Wv6D coordinator

- World IPv6 week scheduled for next year
- “Dead end” date suggested by Vint Cerf – 1.1.2013
- At that the date we turn on and leave on IPv6?
- It would be exactly 30 years to the day from the time the IPv4 network was launched live (the big NCP to TCP/IP flag day)

2011-04

We'll include the suggestion, to allocate by default /32 and give out up to /29 without additional documentation only to those who ask.

New text:

Organisations that meet the initial allocation criteria are eligible to receive an initial allocation of /32. For initial allocations up to /29 no additional documentation is necessary.

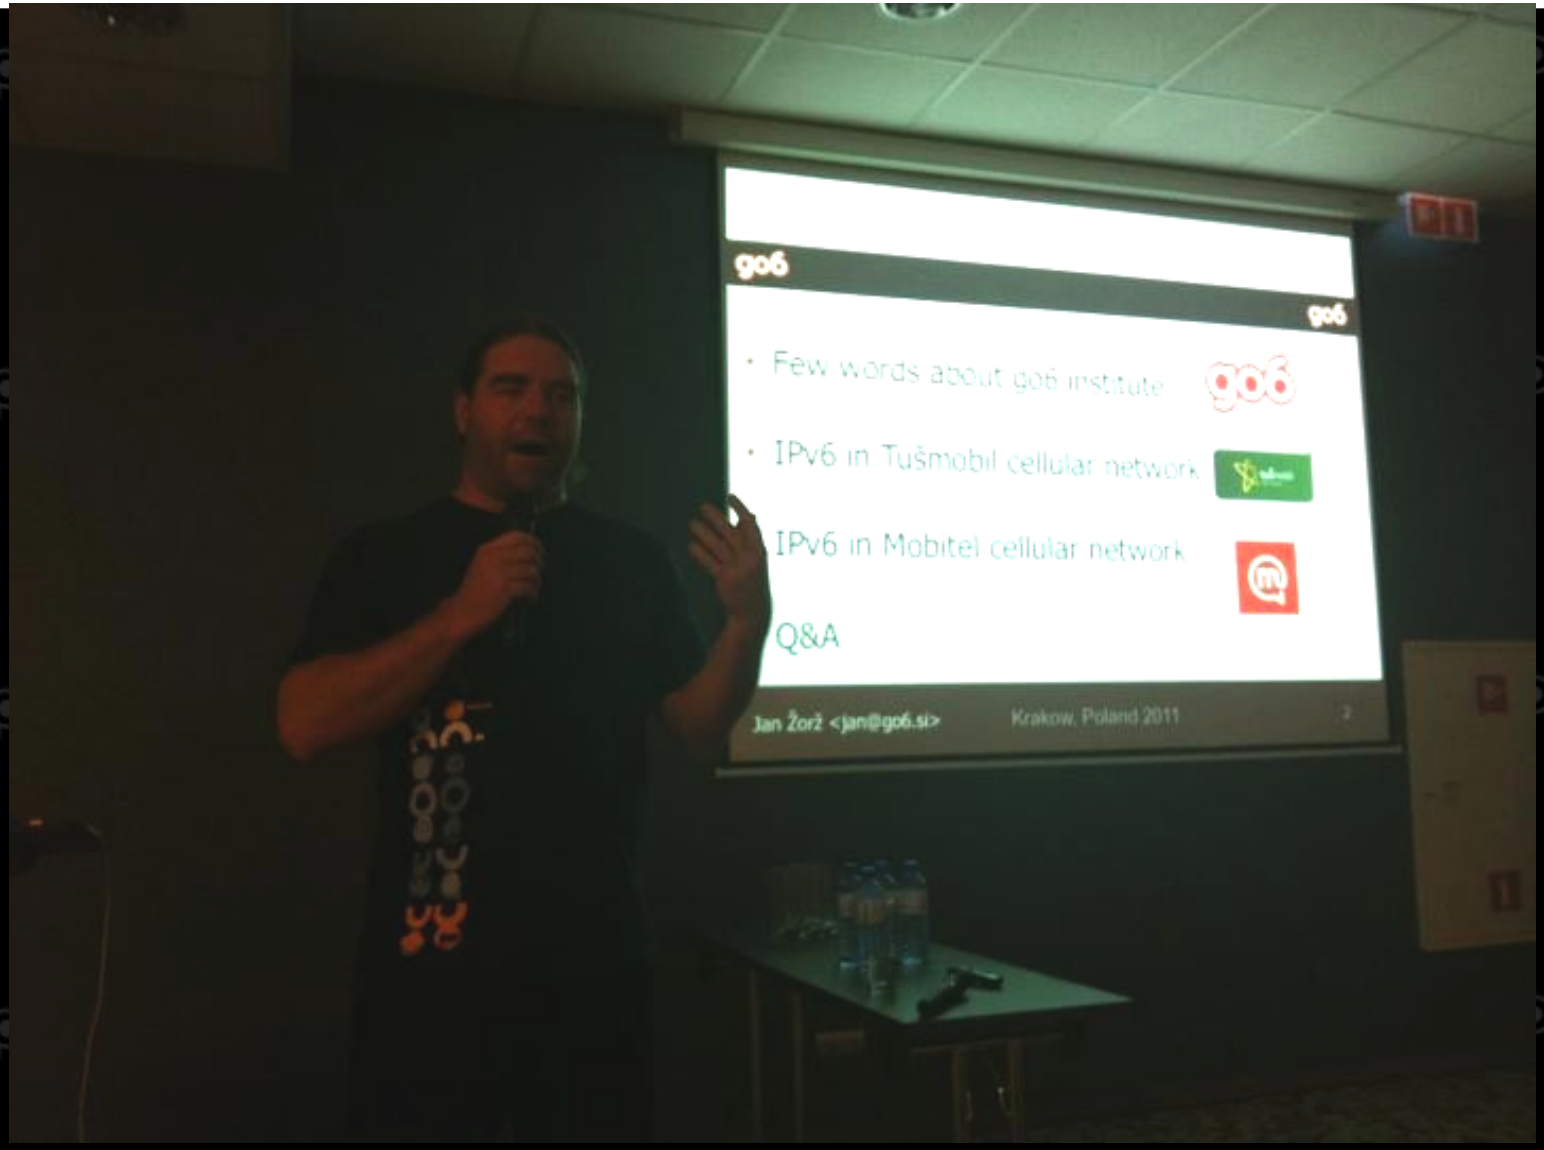
World IPv6 tour

World IPv6 tour continued…

Around the world (Macedonia, Junij 2011)

Around the world (Dubrovnik RIPE-NCC regional meeting)

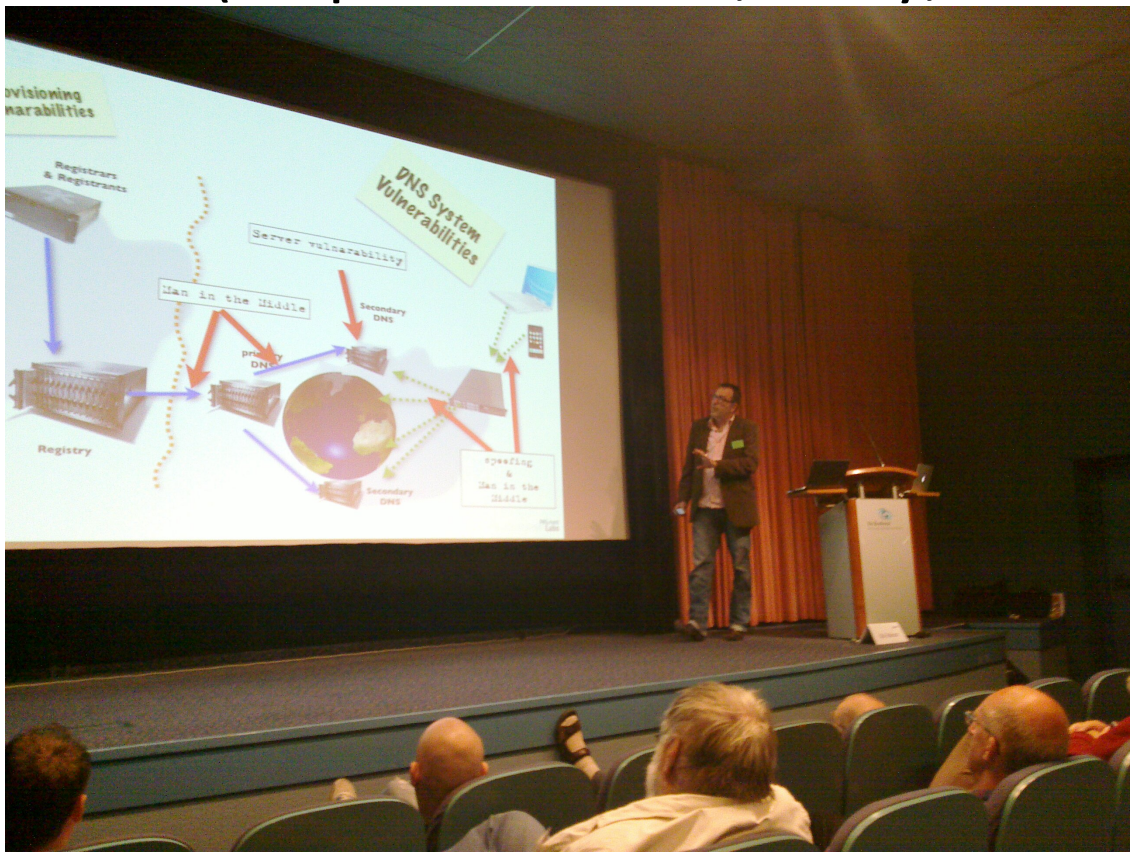
Around the world (Euronog, Krakow, Poland)



Around the world (MENOG9, Muscat, Oman)

IPv6 world tour continued…

- NLUUG, Netherlands (no picture of me, sorry, that's Olaf Kolkman)



OECD Foresight meeting, Paris, France

RIPE63 - Vienna

Ole Trøan (Cisco) and Jan Žorž (go6) presenting 2011-04 proposal

IPv6 world tour continued…

- 8,9.11 – 6. Slo IPv6 meeting
- 21,22.11 – IPv6 meeting – Stavanger (Norway) - Go6 presentation
- 28.11 – 1.12 – Brazilian IPv6 summit – Sao Paulo (Brazil) - Go6 presentation
- December – time off (nice try…)

- Next year? Agenda is already filling up ☺

RIPE64 - Ljubljana

RIPE 64 will take place from 16 - 20 April 2012 at the Grand Union Hotel in Ljubljana

That means no Slovenian IPv6 summit in spring, next one in November 2012

Questions?

- Thank you.
