## Pushing the IPv6 deployment in Slovenia, EU and wider

The essence of go6 Institute's efforts is to ensure an **economical, efficient and coordinated transition of networks and services to IPv6 internet protocol**. Mutual **cooperation** in the process of transition to the new protocol will enable the organisations and companies to respond quickly to the forthcoming change.

### What is go6.si?

go6 Institute is a Slovenian non-profit umbrella **organisation and initiative** for the deployment of IPv6. The essence of our efforts is **raising awareness, education, consulting and assistance** in the **deployment of IPv6 Internet protocol on the territory of Slovenia, EU and wider**.

### Why become a member of go6.si?

go6 Institute **consolidates state-of-the-art know-how** in the field of IPv6 technology and **experience** from the past IPv6 implementation projects at various operators and content providers. **Its mastermind is Jan Žorž**, an active member of an international group of experts, co-author of the IETF RFC6346 - "The A+P Approach to the IPv4 Address Shortage", envisioned to extend the IPv4 technology's life until IPv6 is fully implemented. Jan is also primary co-author of IPv6 procurement document RIPE-501, that achieved great success worldwide and is used by many governments and enterprises for setting the IPv6 requirements when buying ICT equipment.

Members of Go6 have various benefits – access to **better prices** for IPv6 consultancy services of Go6 experts, **logo advertising** at go6.si web portal, mention of members name at big events around the world, access to Go6 community consisting from local members from the industry and government and twice yearly **special Go6 social networking event** for members only, where you can meet new people from the industry and get new business opportunities.

In Slovenia, go6 is actively cooperating with the **Mistry for Higher education, Science and Technology** (MVZT), **Post and Electronic Communications Agency** (APEK) and other research and educational institutions (ARNES, LTFE...).

### go6lab

go6 Institute establishes and maintains a **laboratory environment** for the purposes of **testing of IPv6 services and IPv4 to IPv6 transition procedures**. The affiliated members and hardware providers have a chance to supplement the laboratory equipment with their hardware and software, having it assessed for its suitability for use in IPv6 networks in the territory of Slovenia, EU and wider. Go6 is also a member of IPv6 Ready Logo Committee and testing and certification under this program can be performed in our lab. Go6Lab is also one of funding members of BOUNDv6 project.

## Membership in go6.si

The plans include the following member benefits:

### Golden membership:

- Included 5 institute expert consultant's days (6 hours/day) at the member's site
- The possibility to obtain "go6.si IPv6 certified" certificate for the network
- The possibility of testing and development of specific solutions in the go6lab laboratory according to the member's requirements
- Access to all findings and results of go6lab laboratory's research and development
- A large member logo displayed on go6.si website and all events organised by go6
- Participation within the assembly of members and the possibility of election into the organisation council.
- 3 invited representatives to exclusive Go6 social networking events (2 per year)
- Lower initial price for additional consultant's days (see below the priceist)
- Various levels of discounts when purchasing more than 10 additional consultancy days.

Annual membership fee: 8.000 €

### Silver membership:

- Included 2 institute expert consultant's days (6 hours/day) at the member's site
- The possibility to obtain "go6.si IPv6 certified" certificate for the network
- Limited possibility of testing and development of specific solutions in the go6lab laboratory according to the member's requirements
- Access to all findings and results of go6lab laboratory's research and development
- A large member logo displayed on go6.si website and all events organised by go6
- 2 invited representatives to exclusive Go6 social networking events (2 per year)
- Lower initial price for additional consultant's days (see below the priceist)
- Various levels of discounts when purchasing more than 10 additional consultancy days.

Annual membership fee: 3.000 €

### Bronze membership:

- Access to all findings and results of go6lab laboratory's research and development
- A large member logo displayed on go6.si website and all events organised by go6
- 1 invited representative to exclusive Go6 social networking events (2 per year)

Annual membership fee: 1.000 €

### Prices for a consultant's day (6 hours):

- Golden member: 1.200 €
- Silver member: 1.500 €
- Bronze member: 2.000 €
- Non-members: on request

All prices are excluding VAT and travel costs for consultancy outside Slovenia.
